To: All Planholders for the Non-Potable Water Distribution System – Phase III Project

Re: **Clarification to Questions**

This document contains clarifications to questions asked by potential bidders. Any additional questions need to be submitted to the City at engineering@brentwoodca.gov.

1. Is the General Contractor required to use JDH Corrosion to perform the cathodic protection testing?

The City, and/or a consultant retained by the City, will perform the initial cathodic protection testing; however, the Contractor will be responsible for the costs of any subsequent tests required to substantiate compliance with Contract Documents, and any associated remediation costs.

2. Was a Geotechnical Report completed for this project?

Yes, a Geotechnical Report was completed for this project and is available on the City website located at: http://www.brentwoodca.gov/gov/pw/cip/pw_projects_out_to_bid.asp

Sincerely,

James Campero, P.E.
Construction Manager
